Phosphax sc Phosphate Analyser

Hach's digital on-site analyser Phosphax sc with weather proof housing is ideal for the high precision determination of orthophosphate concentration directly at the tank. The instrument offers a wide measurement range for a variety of wastewater and drinking water applications with detection limits as low as 0.05 mg/L and response time of less than five minutes including sample preparation. The Phosphate Analyser also features minimum reagent consumption and easy handling with analysis accessible at all times.

The Phosphax sc can be connected to the SC200 (power box required) or a SC1000 controller to provide versatile output options including 4-20 mA Output, Modbus RS485, Profibus, or Hart.

Prognosys is a predictive diagnostic system that allows you to be proactive in your maintenance, by alerting you to upcoming instrument issues. Know with confidence whether changes in your measurements are due to changes in your instrument or your water.

Claros Enabled products share measurement data and status information with Claros - The Water Intelligence System from Hach. Claros provides greater confidence in your data, resulting in improved efficiencies in your plant’s operation. To ensure you achieve the full benefits of Claros, insist on Claros Enabled instruments.
